YOUR NAME

AI/ML STUDENT | PYTHON | DATA ANALYTICS

City, India | +91 XXXXX XXXXX | youremail@example.com | LinkedIn: YOUR URL

PROFESSIONAL SUMMARY

Computer Science student specializing in AI and Machine Learning, with a foundation in Python, data analysis, and machine learning concepts. Interested in building practical AI solutions and Machine Learning systems through collaborative projects.

SKILLS

Python • Machine Learning Fundamentals • Pandas & NumPy • Data Cleaning • SQL Basics • Git & GitHub

PROJECTS

Smart Meter Anomaly Detection – Built a student-level anomaly detection prototype using Isolation Forest to flag unusual smart-meter readings and summarize potential irregularities.
Exploratory Data Analysis – Analyzed a sample dataset with Python to identify missing values, summarize trends, and present findings using charts.

EXPERIENCE

Academic and personal projects
Built Machine Learning models in Python as part of coursework; she presented results to her faculty mentor.

EDUCATION

B.Tech in Computer Science, Your College Name, City | 2022 – 2026 | CGPA: X.XX

CERTIFICATIONS

Machine Learning – Online Certification

LANGUAGES

English, Hindi, Telugu
